

Welcome to our SailSAFE Plan

It is always our priority to keep our guests and crew safe while travelling with us. In the environment of COVID-19 we want our guests and crew to have confidence that their safety and wellbeing have been thoroughly considered.

We have put in place a range of tested and proven protocols to manage our expeditions in a world in which COVID-19 exists. We have partnered with Respond Global, a specialist medical advisory agency, to develop this system that is among the most thorough in the world.

Our key focus is on preventative measures where our protocol includes mandatory vaccination and COVID-19 testing for all guests and crew prior to boarding. Once on board we have adopted a wide range of mitigation actions and a response plan that is approved by authorities in the regions in which we operate. Our plan is supported by Standard Operation Procedures, developed for each vessel requirements specific to the cruise destination.

We have maintained a high standard of safety and guest comfort for almost four decades - a record we are proud of.

As one of the first cruise lines to return to operations globally in October 2020, we have safely operated over 100 voyages under SailSAFE and accumulated significant expertise in operating in this environment. We trust this SailSAFE Plan offers you peace of mind as you plan your explorations of Australia's coastline, and the world, with Coral Expeditions.

Thank you for your support and we look forward to welcoming you onboard soon.

Mark Fifield
Group General Manager - Director

Before You Cruise:

All guests and crew must complete our pre-screening process.

VACCINATION

We require mandatory COVID-19 vaccination for all guests and crew. To prepare for your voyage, ensure you have been fully vaccinated against COVID-19. Fully vaccinated means you have received two vaccinations as well as any eligible boosters required by state authorities. Medical exemptions are accepted in line with Australian standards. Vaccination for children follow Federal Health and AHPRA guidelines.

PERSONAL LINK QUESTIONS

We require all guests to answer the questions and declarations on the personal link [here](#). At your earliest convenience, access the link using your booking number and surname. Mandatory questions include Vaccination Status, Medi-Vac agreement and SailSAFE declaration. For groups and charters the questions are available in PDF [here](#).

BORDER REQUIREMENTS

All guests must review the official government websites of the states and territories they visit during their voyage and complete the required border declarations and passes. Guests must be able to meet the entry requirements at the time of boarding to be approved for travel. Please follow the links below to the official government websites.

- Western Australia - [Go To Official WA Website >](#)
- Northern Territory - [Go To Official NT Website >](#)
- Queensland - [Go To Official QLD Website >](#)
- South Australia - [Go To Official SA Website >](#)
- Tasmania - [Go To Official TAS Website >](#)

REDUCE YOUR RISK

We ask that all guests and crew self-isolate to the extent possible for at least 7 days prior to departure of their cruise. We suggest the following approach:

- Conduct only essential activities outside of your home
- Avoid exposure to indoor public spaces and transport
- Avoid large social gatherings
- Wear a mask whilst travelling in public transport and in terminals
- Wash hands regularly
- Physical distance in public spaces
- Follow local regulations in region of travel

CHECK-IN & RAPID ANTIGEN TEST (RAT)

Guests must arrive for check-in and clearance screening prior to embarkation. A time and place will be advised, please allow sufficient time for this when making travel arrangements. All guests and crew will be required to take a RAT as part of the cruise check-in process. The RAT is a shallow nasal swab that is self-administered with a 15 minute turnaround for results. Coral Expeditions provide the test kits free of charge. A Coral Expeditions medical practitioner will be at check-in to review your RAT results, and conduct a temperature check. A negative test is required to board for guests and crew.

If significant concerns are raised during screening, guest/s will be asked to postpone their expedition.

During Your Cruise:

Medically developed and Government approved protocols.

TRANSFERS FROM CHECK-IN TO VESSEL

To maintain the safe travel environment, we provide transfers from the check-in location to the vessel (when the check-in location is not at the terminal/wharf). These transfers undergo hygiene and disinfection protocols to maintain your safety.

MEDICAL STAFF ONBOARD

All voyages have a medical professional onboard to monitor the COVID environment. They are there to report and support any changes in guest or crew health and liaise with shore side staff and official health departments. If you are feeling any flu-like symptoms at any time you must call the purser using the phone in your room and arrange to speak with the medical professional.

IF YOU TEST POSITIVE ONBOARD

Any guest who shows symptoms of COVID-19 is required to inform our crew who will administer a RAT onboard. If you test positive, we will be required to follow the direction of relevant state health authorities. This may include a period of isolation in your own stateroom to protect fellow travelers. Guests in isolation will be served our normal meals and beverages in-room and will be attended to by our resident medical professional as required. Coral Expeditions does not cover any liability for loss of experience or other impacts associated with any isolation or quarantine arising from the voyage.

HAND AND RESPIRATORY HYGIENE

COVID-safe practices of mask wearing, hand sanitisation and physical distancing will be required throughout your voyage, including transfers in Xplorers and Zodiacs. Wash stations and hand sanitizer throughout the vessel.

PHYSICAL DISTANCING ONBOARD

Our vessels are naturally spacious, and we manage common spaces to provide the distancing equivalent to 4sqm per person indoors and separation of 1.5 metres. We minimise the movement of large groups of people using staggered calls to group functions such as lectures and meals. For dining, expect to see both indoors and al fresco options. When going ashore aboard the Xplorer tenders, a safe distance between groups and multiple tender trips is provided.

ENVIRONMENTAL CLEANING & DISINFECTION PROCEDURES

Objects that are touched frequently like banisters and door handles are cleaned and disinfected a minimum of 4 times daily. All surfaces are cleaned in a two-part approach designed to rapidly act against COVID-19. Our crew wear PPE for work activities that have higher risk.

RISK ASSESSMENT OF PORT VISITS

Risk assessment for port visits are developed prior to each cruise and adjusted in real time as needed. Port visits may be changed or altered as required to remove exposure to shore-side hotspots or suspected outbreaks.

STAFF TRAINING

All staff receive comprehensive training on this plan and corresponding responsibilities. Each ship and crew undertake scenario based, practical training to ensure protocols are understood and practiced, including training on PPE use.

VENTILATION SYSTEM

Our vessels are designed with large open spaces and deck areas to maximise social distancing whilst indoors and for you to enjoy the natural outdoor air on deck. All vessels run modern a/c systems that manage the air flows and filtration to maximise the purity of the air quality within the vessel. Air is not recirculated and the additional

SailSAFE

Our **Health & Safety Plan** for guests & crew

Thank You

Coral Expeditions will continue to monitor the COVID situation in the country and adjust our testing protocols as required. We thank you for your patience with these temporary inconveniences.
